

In History we will be... finding out about the history of transport – cars, trains and air travel. We will be studying famous people such as The Wright Brothers and Amelia Earhart

In Geography we will be... mapping our route to school using a map of the local area and aerial photographs. We will look at ways of travelling to different places in the UK, Europe and beyond. We will be looking at the seven continents and the five oceans of the world.

Let's get Moving

Trips, events and visitors...

Trips around the local area to look at different forms of transport and the amount of traffic.

In Science we will be... looking at how animals and humans move, and why exercise, hygiene and healthy eating are important for growth and a healthy lifestyle. We will also look at the life cycle of animals and their young.

In Art we will be... sketching different forms of transport from around our local area to develop a wide range of art and design techniques: such as, colour, pattern, texture, line, shape, form and space.

In Design Technology we will... become inventors and will begin our journey by researching different types of vehicles. We will then start the planning process and look at what features we will include on our vehicle and how we will make it move. Next we will sketch a design, label the parts and list the equipment needed. We will then write a set of instructions about how to create our vehicle and then follow these to make it. Finally we will test and evaluate how well our vehicle works.
